

COFFEE SHOP - SALES ANALYTICS PROJECT

Objective: Analyse historical sales data to identify revenue drivers, product performance, peak trading periods, and opportunities for revenue growth.

Business Goal

Increase revenue and improve product performance

Data Source: Bright Coffee Shop Sales

Technology

Databricks | SQL | Data Visualisation

Business Problem

The new CEO wants to understand how the coffee shop is performing and where opportunities exist to increase revenue.

Key Business Questions

- Product Performance: Which products generate the most revenue?
- Customer Demand: Which products are purchased most frequently?
- Sales Trends: How does revenue change across days, product and time intervals?
- Growth Opportunities: What actions could improve sales performance?
